News Release

TOYO Awarded Gas Processing Plant Rejuvenation Project in Malaysia

Dec. 18, 2012

Toyo Engineering Corporation

Toyo Engineering Corporation (TOYO, President and CEO Katsumoto Ishibashi) and Toyo Engineering & Construction Sdn. Bhd. (Toyo-Malaysia), the group company in Malaysia, as a Consortium, has been awarded a contract for rejuvenation and revamp project of the gas processing plant No.4 with a capacity of 250 million cubic feet per day for PETRONAS Gas Berhad (PGB), a subsidiary of the Malaysian national oil company PETRONAS in Kerteh, Terengganu in eastern Malaysia. TOYO provides engineering, procurement, construction and commissioning with turnkey contract for expanding the plant life of another 20 years.

TOYO's track records of various projects for PGB including those for the existing gas processing plant No.1 and No.2, and TOYO's basic design for rejuvenation and revamp No.1, No.2 and this No.4 projects led to the award this time.

TOYO will actively expand business in Malaysia, where investments in large oil refinery/petrochemicals complexes are expected to be active from now on.

Project Summary

- Client: PETRONAS Gas Berhad (PGB)
- Contractor: Consortium of Toyo-Japan and Toyo-Malaysia
- Site: Kerteh, Terengganu, Malaysia
- Facilities: Gas Processing Plant No. 4, Kerteh Compressor Station B and Dew Point Control Unit No.2
- Scope: Turnkey contract for engineering, procurement, construction, and commissioning
